***Disclaimer:**

As always, do your own due diligence. None of this is financial advice.

It's just our opinions and should be viewed as such.

Before proceeding with any investments or trades, you should do your own due diligence and research, as well as seek advice from an independent licensed professional.

We do NOT accept liability for any investment decisions, on this Website and associated software and education programs are done only for educational and entertainment purposes.

Although we strive for the information provided to be correct and accurate, we do NOT guarantee it to be correct or accurate at all times, nor do we assume liability for what you do with it.

We always think it's a smart idea to do your own due diligence and research and come to your own conclusions.

The Key is Informed Educated Decisions based on data provided by the Trade Canary Software this can give the tools necessary to make informed decisions on what you as an individual decide to do with your investments in your own trading account.

Markets go up as well as down, do not risk any more then you can afford to lose , a recommended risk management plan is always a good idea and educating yourself regarding how the markets work is to your long term benefit.

Refer to a qualified accountant regarding taxation law and especially capital gains.

Refer to a licensed stock broker to set up any trading accounts
(we recommend Capital 19 Global stocks and Options) <https://capital19.com/>
