- **Basic options trading Course @ \$75 per week (x 8 weeks)** this gives you lifetime access to www.trade-canary-australia-nz.com as a member and access to all the education videos and the course content on line .
- **You will be shown how to establish you own trading account** and connected to capital 19 to do this . (that means you have you own independent trading account where you can deposit money in and withdraw (like another bank account)
- **You will get trades given to you FREE of charge weekly** (it's is up to you to activate these trades) however our Education course explains to you how . some of these Trades Tips are done by Graham Healy on a local level by using trade canary software to determine suitable trades .
Graham will teach you the process on how to use Trade canary to produce a never ending flow of good trades .
- **As a BONUS you will get the Trade Tips from Trade Canary USA (at no extra charge) .**
(when you subscribe to Trade Canary USA you will have access to these trades plus the monthly webinars and advanced education system produced by Trade canary USA, in other words direct access to the system)
- **BUILD YOUR CONFIDENCE**
The basic training that Graham Healy is doing is designed to build your confidence, options trading can be very complicated, however Graham has done over 2 years studies on options trading , with another 12 months of live trading , to be able to make it simpler for you to learn the system (Graham also holds a med-science degree (chiropractic) and is a qualified TAFE teacher .)
My analytical medical mindset lead me to Trade Canary because I needed a data diagnostic tool to screen trades without emotion (or gambling) I needed that DATA to make informed decisions and Trade Canary provided me with that .
(and it will do the same for you to)
- **SUPPORT**
I am there to mentor you (Graham Healy) and we do this by building a WIN/WIN relationship during the learning process .

- **Options trading**

Imagine you put \$1,000 aud in the bank for 12 months 5 % is all you will get over 12 months $\$1,000 \times 5\% = \50 or .96 cents per week
or

you put \$200aud into an options trade and the return was \$600 aud in 24 hours
yes 3x your money in 24 hrs = +300% .

I remember my first Earnings trade on Morgan Stanley I placed \$200aud (on the options contract) and that returned \$800 aud in 14 days a 4x return or + 400%
On the S & P 500 at the big dip in April 2025 (\$200aud returned \$2,000 aud 10x).
so the right trades over time can give you significantly higher returns then any bank account .

- **Asymmetrical risk**

In the lecture on Asymmetrical risk you learn to only place a small percentage of your trading float . for example if you only have \$1,000 aud then \$100 Risk per options contract , if \$5,000 aud then \$150 per options contract ,
if \$10,000aud then only \$1,000 per options contract (or in this case you would get 10x \$100 contracts) .

when you apply asymmetrical risk you can have 10 trades , 7 of those zero out and 3 are profitable (say \$2,000 wins) $(3 \times \$2,000 = \$6,000 \text{ profit})$
and that's based on $10 \times \$100 \text{ contracts} = \$1,000 \text{ risk}$ for \$6,000 returns .
with Asymmetrical risk applied 7 out of 10 can zero out and you still 6 x your money.

THE KEY is filtering good solid trades and trade canary does that for You.

- **Trade canary principal of Long term trades vs short term**

Generally with trade canary we are looking at long term contracts on solid companies (over 1 billion market cap) for options and shares , the only exceptions to this is **EARNINGS TRADES** which can be like short term cash flow injections .(we will show you how to do these trades) . Trade Canary now has a dedicated page to filter these trades and is of great advantage to us every earnings season (4 times a year).

- **Trade Canary ongoing development**

The developer behind the creation of trade canary(Eric) is continuously upgrading and refining the software to produce more specific results day by day week by week , so we are continually evolving .

ok I hope that gives you a good overview of the Package deal

Look forward to helping you secure another income stream with trade canary .

Graham Healy
